PROJECTS

BloggerVerse

Created a blog app using MongoDB, Express.js, React, and Node.js (MERN stack). Built a user-friendly interface with easy content management. Integrated frontend and backend for dynamic features, making blogging enjoyable.

MongoDB, ExpressJS, ReactJS, NodeJS

UserHub

Created a comprehensive user registration system for a new website, leveraging MongoDB as the database to store and retrieve user information. The project aims to not only facilitate a secure and user-friendly registration process but also provides a dashboard where users can view and manage their profile information.

HTML, CSS, JavaScript, NodeJS, ExpressJS, MongoDB, Bootstrap

NewsFlasher

Created a dynamic and modern news website using the Fetch API to retrieve news data from a News API. The website provide users with the latest headlines, allow them to search for specific topics, and display detailed information about each news article.
